To: Ron VanZee, April Hilton, Planning Commission members

From: Roy Griffiths, Marilyn Morehead

Re shoreland Protection Strip subcommittee review, 8390 Boyne City Rd.

Date: 07/15/24

The proposed project at 8390 Boyne City Road is for the construction of a new single-family residence being built on a 6.038-acre parcel. The applicant has proposed a that the shoreland landscape plan consist of leaving the shoreland area in it natural state with no plans for a dock or deck at the current time.

An inspection of the property shows that it runs in excess of 850 feet from the road to the Lake Charlevoix water front. The first 400 feet from the road way reveals a very gradual slope of 10' over the 400 feet, ending at a plateau with steep bank which drops 27 feet over a distance of approximately 40 feet. The ground levels out then it descends gradually over a distance of 465 feet to the waterfront. There is an access drive which runs down the hill around the east side of the identified building envelope and ends some 140 feet from the base of the bank. This end is over 300 feet from the water. The house is to be constructed some 480 feet +/- from the waterfront and the drain field will be located between the house and the road on the opposite side of the house from the waterfront

The area from the access road consists of a mixture of trees, grasses, weeds and brush/saplings. The area within 50 feet of the water has the same natural ground cover and has a variety of trees, saplings, grasses and weeds covering the area. The most recent highwater event has deposited stones on the waterfront and regrowth of plants disrupted by the water is evident. An inventory of the major trees and plants submitted by the applicant shows a mix of pines, cedar, birch, aspen, maple and oak. The ground cover consists of the aforementioned grasses and weeds.

As the applicant has indicated that their plan is leave an area far in excess of that which would be considered the required 50-foot shoreland protection strip in its current natural state, it is anticipated that no further action be required. Should the applicant decide in the future to build a walkway, deck or dock they would need to seek permits from the township and other appropriate regulatory agencies.

Andrew Schneiden
6075 M-32
East Jordan, MI 49727

Permitted Location:		
Address:	08390 Boyne City Rd	Permit Number: C23-305
County:	Charlevoix	Permit Type: Septic and Well Permit
Township:	Hayes Section: 3	Permit Issued For: Conventional System
Subdivision:	Lot:	Replacement or Repair: No
Tax ID #:	15-007-003-007-30	Residential/Non-Residential: Residential

Design Criteria		
Number of Bedrooms:	3	Soil Classification: S (Sand)
Gallons Per Day:	375	Seasonal High Water Table: >72 inches

System Design Specifications

Septic Tank Gallons
1000

Proposed changes to permit must be approved prior to installation.
Call our office at the number listed above if you have any questions regarding this permit.

Design Type	Absorption Area	Size of Pipe	Number of Trenches	Length of Trenches	Width of Trenches	Max. Depth of Trench Bottom	Pipe Spacing
Trench	375 Sq. Ft.	4"	3	42 Feet	3 Feet	24"	7.5 Feet

Permit Requirements/Conditions:

1. Isolate all portions of the system a minimum of 50' from all water well(s).
 2. It is strongly recommended that a sewage effluent filter be installed in the outlet baffle of the septic tank.
 3. All riser lids must be manufactured to weigh a minimum of 59# to prevent unauthorized access to septic tanks and pump chambers.
 4. Septic tank(s) and pump chamber shall be low-profile, top-seam tanks, installed with seams above the water table.
 5. Buoyancy calculations, ballasting and pump sizing are the responsibility of the installation contractor.
 6. Contractor responsible for maintaining 10' from all property lines with any portion of the wastewater system.
 7. Replacement drainfield area is identified directly NORTHEAST of initial drainfield location. Drainfield replacement area should remain in a natural, undisturbed state, free of buildings, driveways, trees, etc.
 8. Connect all waste plumbing into new sewage disposal system.
 9. Remove any trees in drainfield area to avoid root intrusion. Strongly recommend 15'-20' perimeter around new drainfield.
 10. Provide level area for drainfield by cutting and grading as needed
 11. Wastewater system must remain uncovered for final inspection and approval.
- ALL WELL PERMIT CONDITIONS
1. Owner responsible to obtain a safe bacteriological water sample prior to use. Sample bottles available at health department offices.
 2. Well driller is required to submit a well record to the owner and the health department within 60 days of well completion.
 3. Isolate the new well a minimum of 50' from any potential sources of contamination, including all portions of the septic system.
 4. If an artesian flow is encountered the flow shall be contained within the permanent well casing as required. No flow shall be allowed outside the casing without written deviation approval from this agency.
