Carol Kerr discovered that she had Stage 3-c high grade serious carcinoma of the uterus. Carol had surgery on her cancerous tumors on February 7, 2022. We all were elated to hear the doctors had gotten all the cancer out! She has been going through some extensive chemotherapy, next she will have to undergo radiation therapy. Please keep the prayers coming and try to attend the dinner her family and friends are having to help with the financial hardship that has been forced upon their family.
